Payment Gateway Integration

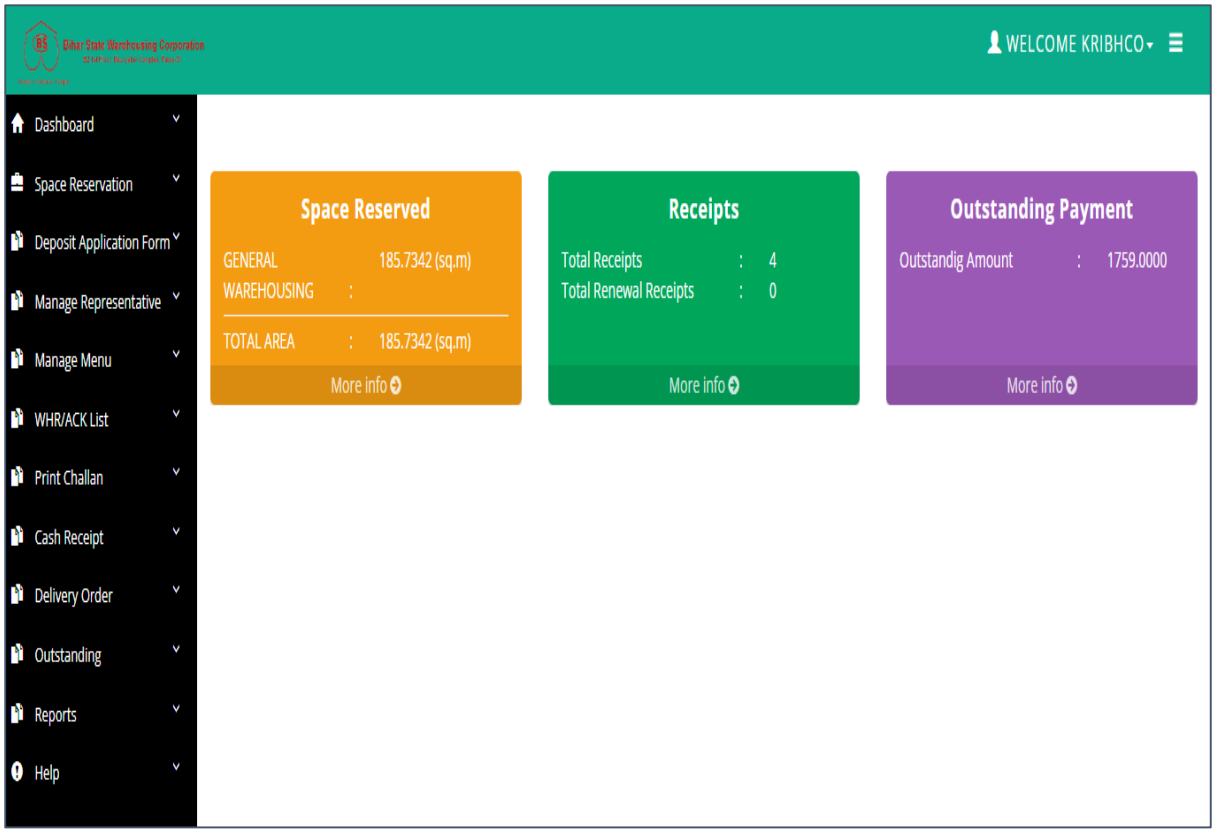

A payment gateway facilitates online transactions by securely connecting merchants with banks or financial institutions to authorize and process payments made by customers. Payment gateways provide a way to securely transmit payment data between the customer, merchant, and the bank, ensuring that sensitive information such as credit card details or personal information is encrypted and protected.

1. Payment Authentication steps:

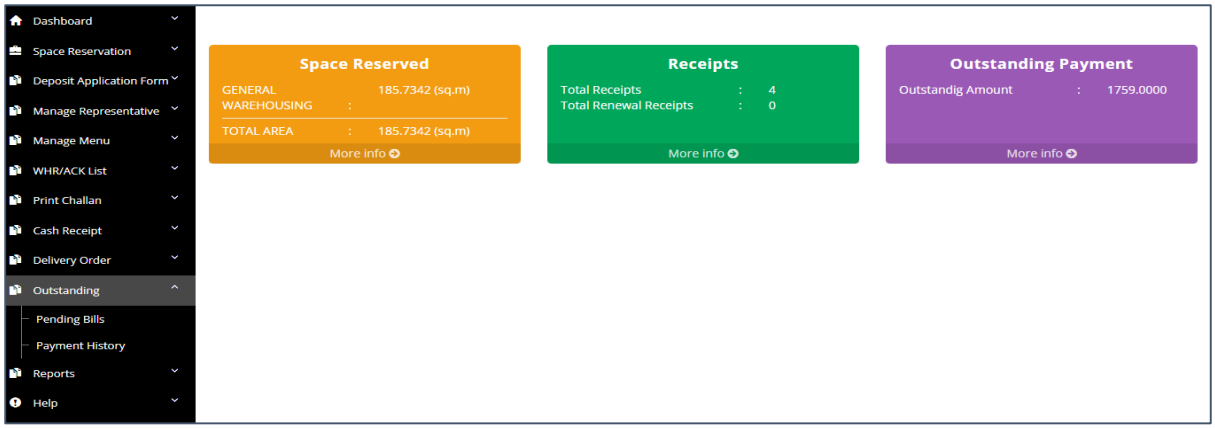

1.1 In WMS(e-Bhandaran)

The various steps involved in the payment integration process are:

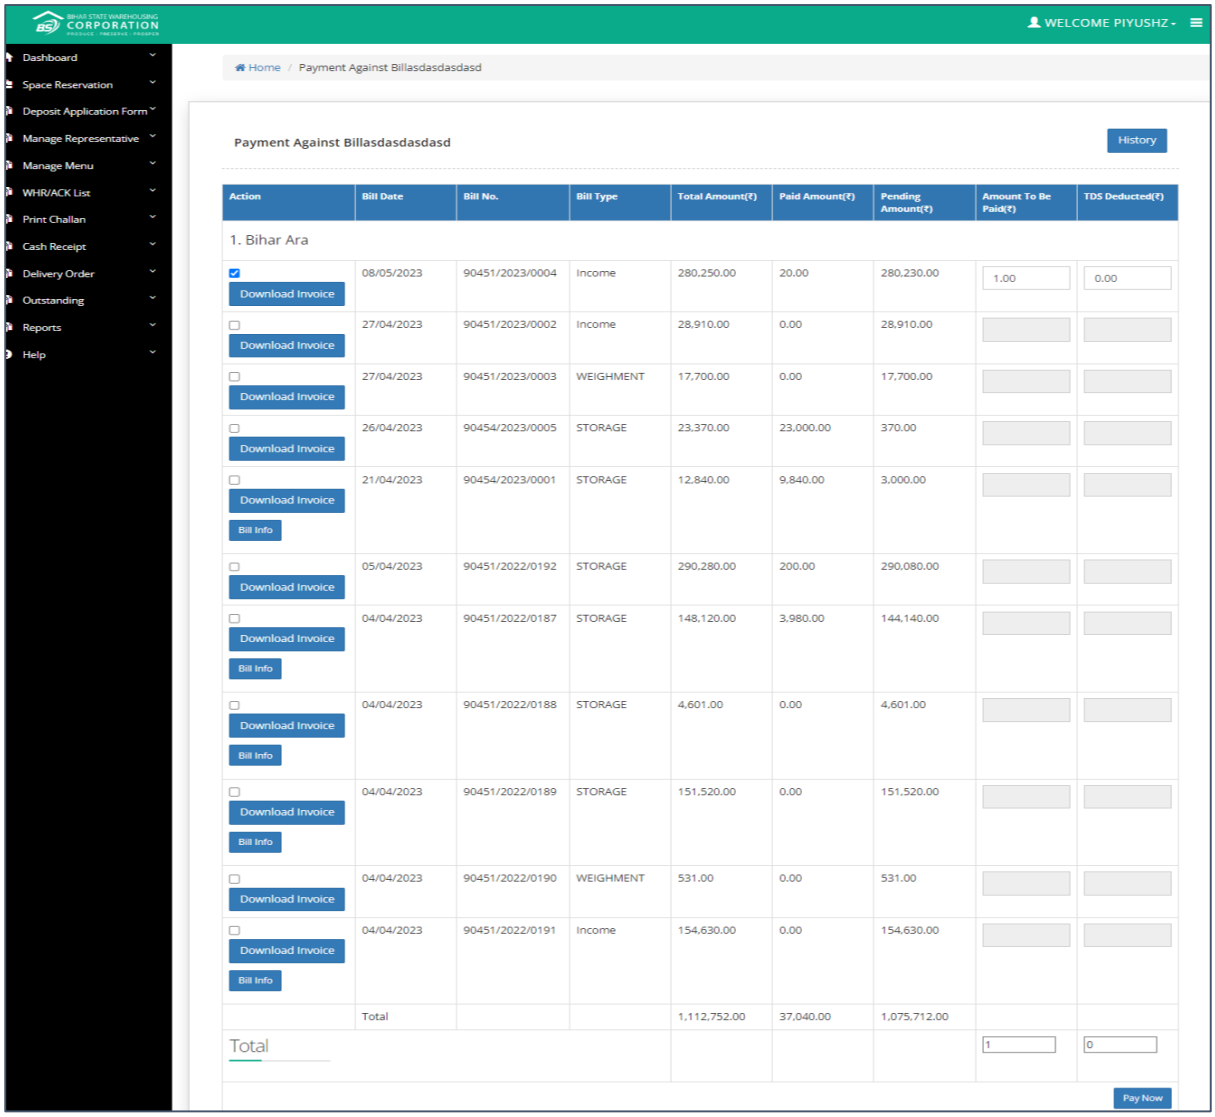

- The user will log in the WMS(e-Bhandaran) through the login details provided.
- Upon successful login, the user will be taken to the following screen:

- Here, the user can view his pending bills and payment history by clicking on the “Outstanding” menu.

- Once the user clicks on the "pending bills" option, a listing screen will open displaying all the pending bills against that particular user.

- A checkbox is provided against each bill for selection.

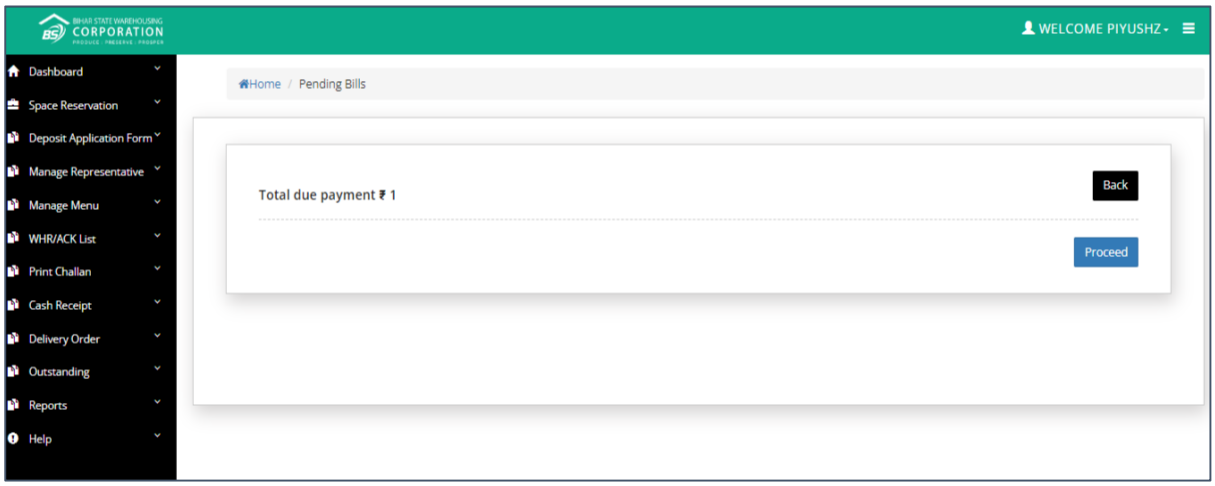

- The user will select the checkbox provided for the bill against which he wants to pay.

- After selecting the checkbox, the user will enter the following particulars:

    - Amount to be paid against that bill
    - TDS deduction

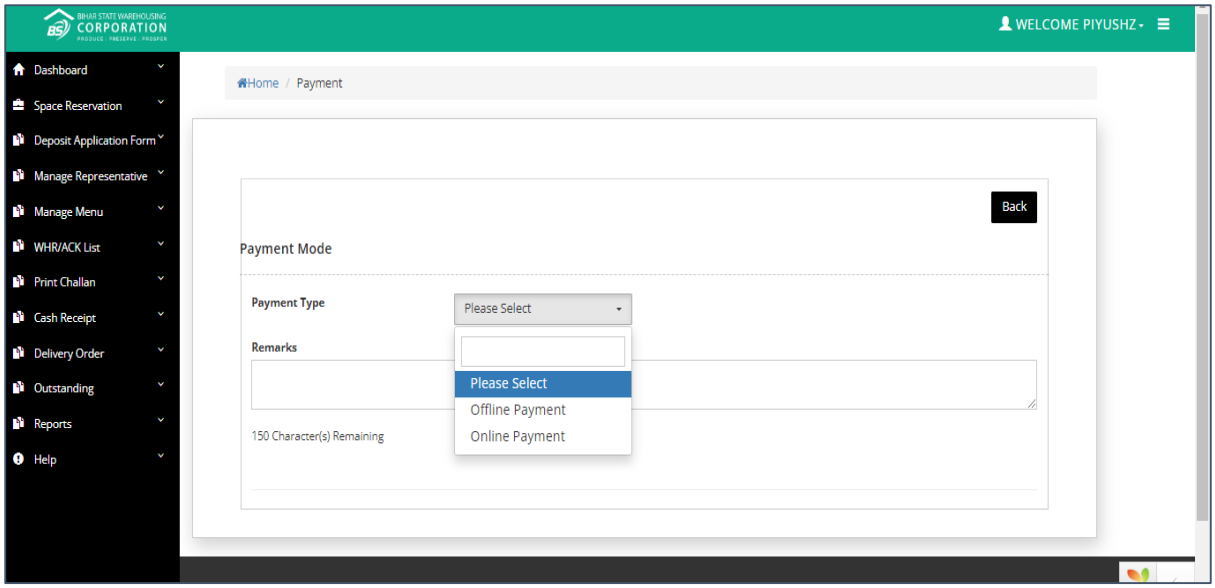

- After entering the aforementioned details, the user will click on the “Pay Now” button provided at the bottom of the screen.

- By clicking on the “Pay Now” option, the user will be redirected to the following screen:

- Here, the user will verify the amount and click on the “proceed” button.

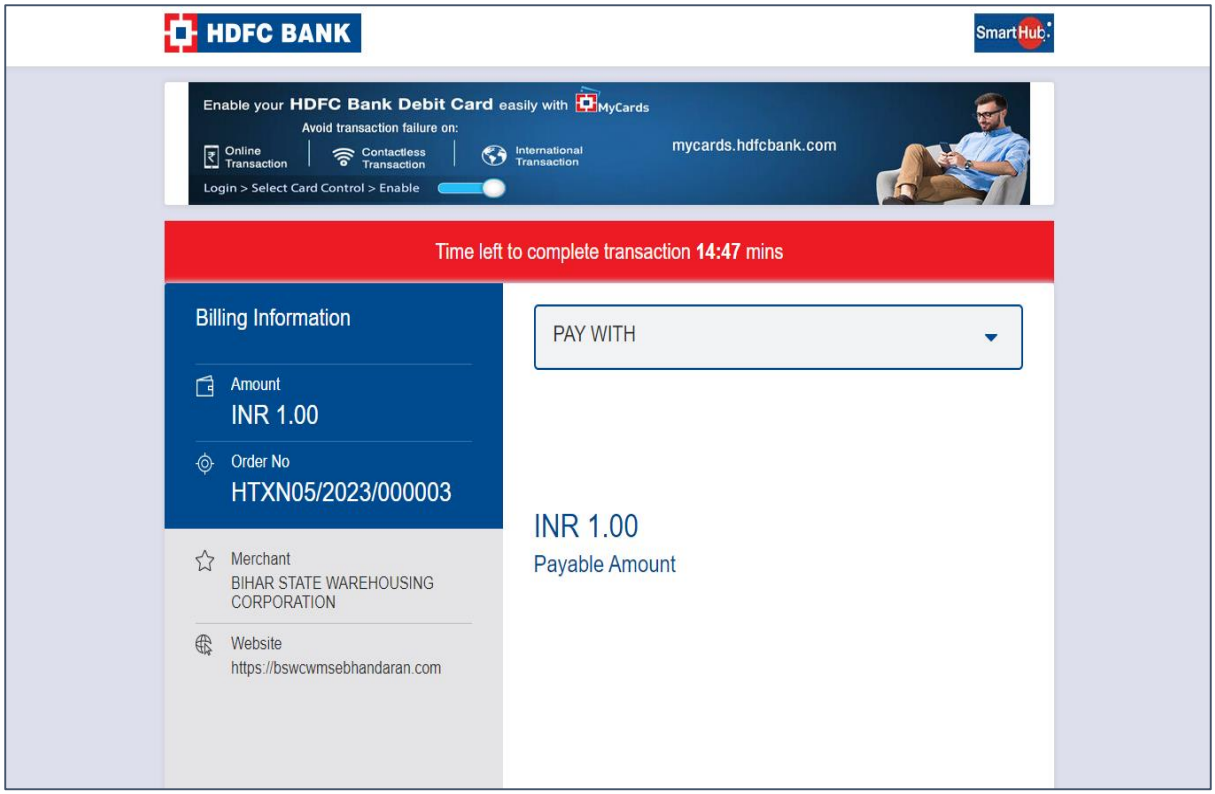

- By clicking on the “proceed” button, the user will be redirected to the following screen:

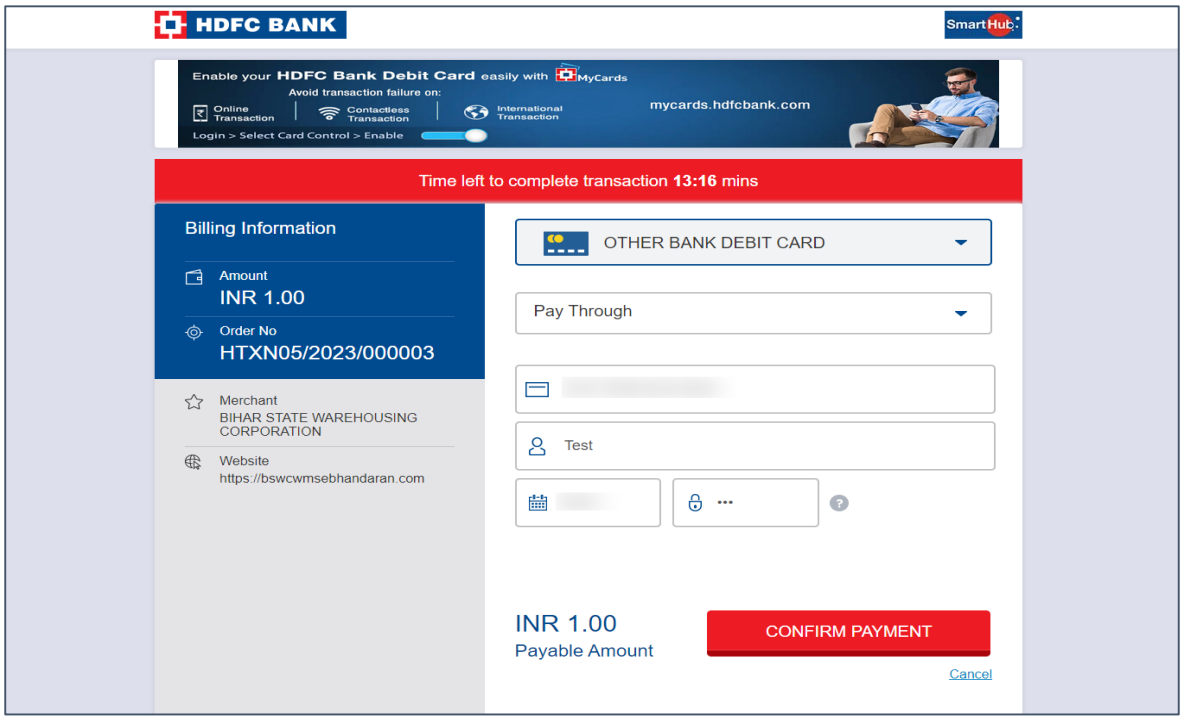

- On this screen, the user will be able to select the following details:
  - Payment type: The user will choose "online" from the dropdown menu.
  - Remarks: The user can enter any additional comments or notes.
- After selecting the payment type and entering any remarks, the user can proceed by clicking on the "Pay" button.

1.2 On Merchant Bank Website

- Upon clicking the "Pay" button, the user will be redirected to the website of the merchant bank.
- At the merchant bank site, the user will need to authenticate and verify the chosen payment method.

- After providing the necessary details, the user can proceed by clicking on the "Confirm Payment" button to authenticate and finalize the payment.

- Once the user successfully completes the payment authentication process, the payment for the pending bill will be successfully processed.
